

Helix Hydrocutting System

High Quality Curly Fry Cutting
at a High Volume

Common Food Applications

Potatoes

Vanmark's hydrocutting machines cut food products using water powered by a pump loop to accelerate it through a fixed array of stainless-steel cutting blades. Now we're adding curly fry spirals to the mix! The Helix Hydrocutting System is a high-volume cutting system that's highly configurable to your throughput and footprint. Its ease of maintenance with toolless blade changeouts and annual rebuild service by Vanmark technicians is a vast improvement over high-maintenance mechanical cutters.

This industrial curly fry cutting equipment allows processors to enter a high-value product market.

- High volume throughput – 5,000 lbs/hr (2268 kg) per cutter
- Up to 92% sellable product
- Range of system configurations, from 2-12+ cutters stacked for a moderate footprint and mounted to a cutting deck or floor
- Complete system includes a pump, Distributor, cutters, and dewatering conveyor
- Maintenance friendly with patent-pending toolless blade changeouts and an annual rebuild service

Helix Hydrocutting System

Specifications

304 or 316 stainless steel construction

Product Size

Diameter: up to 4" (102mm) bore

Two to 12 or more cutters

Pump Size*

6, 8, or 10" pump assembly

*Dependent on product size

Water Capacity: 82 gallons (310 L)

Electrical: 230-460 VAC, 3 Phase

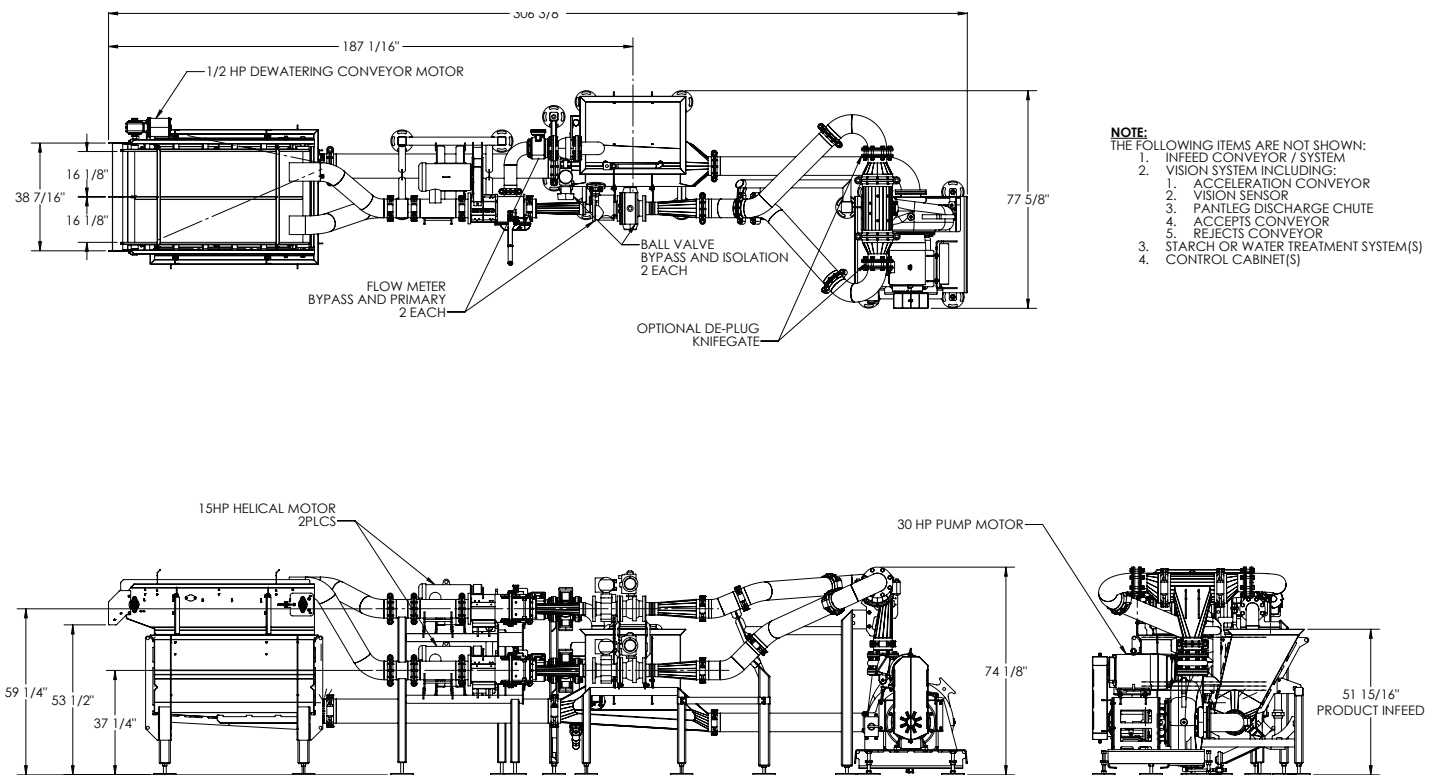

(other voltages available)

Features

- Stainless steel hydrotubes
- Endress Hauser 55S Flow Meters hold consistent cut speeds
- Integrated decelerator and dewatering conveyor
- Integrated central control system
- Vision system

Options

- Additional pump sizes to accommodate larger products
- Patented Distributor that allows dual product flows and switching between flows in case of plug or maintenance

E 8.25 v1
